

# BIO-CLEAN<sup>®</sup>

The Friendly Bacteria Waste Eliminator

## PONDS & LAKES

Bio-Clean The best biological bacteria product we've seen for large, backyard ponds and lakes over 50' x 50' in size!

Bio-Clean is a proprietary blend of beneficial bacteria designed to break down organic material including:

- sludge
- muck
- leaf & grass clipping build up
- dead aquatic weed build up
- fish & fowl debris

This organic matter, if not broken down causes an abundance of nutrients available in the pond that is responsible for:

- excessive planktonic algae growth (green water)
- excessive aquatic weed growth
- low dissolved oxygen levels
- noxious odors in the pond
- sludge & muck build up (which is organic matter taking it's sweet o'l time at decomposing and causing your pond to stink!)

Bio-Clean can be used in a variety of places including:

- large ponds and lakes over 50' x 50'
- cesspools
- sewage lagoons
- bodies of water with heavy build up of organic material

Bio-Clean is completely safe to use in ponds where swimming or fishing occur. It does not attack live tissue nor inorganic material.

It is safe to use in ponds where dogs, birds & other animals drink. It is not considered a 'chemical' but an all-natural, beneficial bacteria product.

The bacteria and enzyme concentration in Bio-Clean is the most powerful beneficial bacteria product on the market today!
